

PUBLIC NOTIFICATION

June 17, 2011

From June 20th through mid-July, Zelenople residents can expect changes to their drinking water. Beaver Falls Municipal Authority will be changing disinfectants during routine maintenance flushing of their distribution system. During the flushing period, chlorine will be used as the primary disinfectant instead of the chloramines that are currently being used. During this period you may experience discolored water and/or a noticeable odor of chlorine in the water. Please be aware that these are normal conditions, and nothing is wrong with the water. Should you experience discolored water during this time, please let your cold water tap run for several minutes until the water clears up. Any chlorine odor will not go away until we return to chloramines disinfection following the system flushing. If you have any questions, please feel free to contact Don Pepe, Borough Manager or Chad Garland, Water System Superintendent at 724-452-6610. Thank you.
